

Stswékstem
Engineered Waste Management Facility
RESPONSIBLE • SUSTAINABLE • RESPECTFUL

Frequently Asked Questions

Will this facility accept biosolids?

No, the facility will not accept biosolids and has no plans to accept biosolids in the future.

Will this facility accept hazardous waste or other toxic material?

No, the facility will not accept any hazardous waste or other toxic material.

Does the facility have an environmental management plan?

Yes, the facility has a detailed environmental management plan that ensure the surrounding environment and community are protected. This includes an extensive list of mitigation measures that prevent impacts to groundwater and surface water, wildlife, and air quality. The environmental management plan also includes a monitoring and compliance component to ensure all mitigation measures are effective.

What is wrong with continuing to use the current TteS landfill?

The existing TteS landfill was constructed in 1960 without a liner system or other engineered controls to manage potential environmental impacts. This facility will be closed using an engineered cap system while the new facility is being developed. No disruption to services for TteS members will occur during the closure phase.

Will TteS band members be charged to drop off material at the facility?

Individual TteS band members will be able to utilize the facility free of charge.

Do you sell topsoil?

Yes, we sell locally generated premium, nutrient-rich topsoil.

When is your new facility opening?

We plan on opening our new Tk'Emlups facility in northeast Kamloops in the late summer/fall of 2022.

Do you accept old propane tanks?

Yes. We are a recycling transfer station for metals, asphalt shingles, batteries, propane tanks, appliances and other miscellaneous household items.

Will you pick up my load?

No, we are a drop-off facility only.

I am doing a renovation this spring on the house; do you take old construction material?

Yes, we accept construction and demolition material, and recycle what we can.

Will you accept old mattresses?

Yes, we accept old mattresses for a fee.

How will leachate be managed at the landfill site?

The landfill will be double lined with compacted clay and HDPE membrane, eliminating the risk of groundwater contamination. Leachate generated in the landfill will be directed to an engineered containment pond.
